

ULTIMA® RINSE AID

Premium Rinse Additive for Automatic Dishwashing Machines

ULTIMA Rinse Aid is a premium rinse additive for use in automatic dishwashers. It promotes free rinsing, sparkling crockery and prevents water spotting and streaking.

Coupled with the use of hot water ULTIMA RINSE AID ensures rapid drying times; tableware is swiftly returned for re-use. Manual drying is eliminated thus reducing labour costs and also preventing cross-infection from the use of towels. SPOT AID is a clear, blue liquid. pH 5.5 – 6.5. It is non flammable and readily miscible with water.

DIRECTIONS: ULTIMA Rinse Aid is introduced during the rinse cycle at a very low concentration of 7-10 ml/45L of water via automatic dosing equipment. For best results flash drying at 80-90°C is recommended. In domestic dishwashers the rinse additive is dispensed from a small reservoir unit which must be kept full.

ULTIMA Rinse Aid may also be used manually. A few ml of SPOT AID should be added to a sink of almost boiling water. Immerse the articles to be rinsed in this solution using a basket or tray, remove and allow to drain.

ULTIMA Rinse Aid is a slightly acidic product and the use of rubber gloves whilst handling this product is strongly recommended. The following general First Aid procedures apply.

Integra Industries

North Island: 42 Riverbank Rd, Otaki
South Island: 21 Glasgow St, Dunedin
Head Office: 149 King Edward St, South Dunedin.
