

ULTIMA® TITAN

Neutral Floor Cleaner

ULTIMA TITAN is a highly dilutable neutral detergent suitable for cleaning hard surfaces especially those coated in protectant or floor polish. Polished surfaces simply cannot afford high pH cleaners due to their “stripping” characteristics - making neutral Diamante the perfect solution for expensive, high finish floors.

DIRECTIONS:

Dust mop floor first – can be used as a manual applied or thru a Auto scrubber

For most general wet mopping applications use at a ratio of 1:100 [1% soln, 10mls per litre] with potable water. For Medium Soil use at a ratio of 1:60 [6 % soln, 16mls per litre] For heavier cleaning use at a ratio of 1:40 [4% soln, 40mls per litre]

For Auto Scrubbers use at a ratio of 1:120 [.83% soln, 8.3mls per litre] for Light Soil. For Medium Soil use at a ratio of 1:80 [1.25 % soln, 12.5mls per litre] For a deep scrub use at a ratio of 1:40 [4% soln, 40mls per litre].

May be diluted stronger or weaker depending on the level of soiling and sensitivity of floor coating.
